

MARCH 2021 NANOGRIPTECH.COM

Breakthrough Gecko
Inspired Grip and Adhesion

Spring is Here at nanoGripTech

We hope your 2021 is off to a strong start.

There is a lot going on at nGt, and we thought you might benefit from learning about some of it.

We are helping a leading **Eyewear Manufacturer** provide a comfortable high grip solution for one of its top brands. It's exciting to be part of this **innovative design process** as we develop prototypes that will push the eyewear industry forward.

A **Consumer Goods Manufacturer** is developing a solution that **provides directional gripping** for their personal care products. This technology is helping the company meet the demands of their evolving consumers.

A leading **Activewear Manufacturer** is looking to provide **enhanced grip for wet and oily conditions**. The ideal solution for this application has eluded the market, but we're now cracking the code.

To think about what's possible for your upcoming projects, reach out to our Expert, Justin Bohn.
